

# Comprehensive CCUS Well Solutions

A **Family** of Energy Service Companies

## THE BEST SERVICES IN THE ILLINOIS BASIN

Franklin Well Services delivers drilling fluids, cementing solutions and stimulation services for oil, gas, geothermal, and CCUS wells. With over a decade of CCUS well experience and a commitment to innovation, we have provided tailored drilling fluids, CO<sub>2</sub> resistant cement blends, and step rate tests.

Basin Supply keeps your operations moving with the region's most reliable inventory and access to chrome pipe, tubulars, and wellsite consumables. From routine completions to specialized CCUS and geothermal projects, we deliver the materials you need on time, on site, and backed by service that understands the field.

From oil and gas to Class VI carbon storage wells, Energy Drilling adapts to every subsurface challenge. Our modern rig fleet and experienced crews have drilled numerous CCUS wells of varying complexity and depths, efficiently and safely.

## ABOUT US

Franklin Well Services, Basin Supply, and Energy Drilling are three family-owned companies working as one integrated team. From drilling and drilling fluids to cement services to acidizing and step rate tests, we combine shared values with specialized expertise to deliver end-to-end well solutions.

## WHY CHOOSE US?

*Our commitment to quality extends beyond service execution—we build long-term partnerships by prioritizing customer success and operational excellence. For more than a decade, these companies have provided services on CCUS wells throughout the region. We understand and ensure that every project meets the highest industry standards.*
