

Stimulation Frac and Acid Treatments

Convenient Location

Strategically located in Indiana to provide well services throughout North America.

Service Offerings

We have several hydraulic fracturing and acidizing units capable of small low rate and pressure jobs to large high pressure jobs. Whether it is a small breakdown job, multistage slickwater frac, or acid treatment with rock salt diversion, we deliver service.

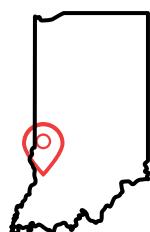

Deep Experience

- 40+ Years of Experience -Thousands of wells completed with precision.
- Regional Expertise - Knowledge of reservoir formations for optimized well stimulation.
- Safety & Compliance - Commitment to regulatory standards and environmental protection.

Franklin Well Services, headquartered in Indiana, is a leading provider of drilling fluids, cementing, well stimulation, and completion services, specializing in the Illinois Basin region. With over 40 years of experience and thousands of wells completed, we bring deep regional expertise and advanced technology to optimize well performance. Our commitment to safety, efficiency, and environmental responsibility ensures cost-effective, high-quality solutions for conventional and carbon sequestration wells. Backed by a highly skilled team and state-of-the-art equipment, we deliver reliable and customized well services to meet the evolving needs of the oil and gas industry.

400 Main Street
Vincennes, IN 47591

Reliable Innovative Proven

At Franklin Well Services, we combine decades of expertise, cutting-edge technology, and a commitment to safety to deliver superior stimulation services. From conventional wells to CCUS and geothermal projects, we provide reliable, efficient, and cost-effective results tailored to your needs.

Specialized Services

► Stimulation Equipment

We have the blending and pressure pumping capabilities to service the Illinois Basin's needs for high rate hydraulic fracturing and low rate matrix acidizing treatments. Equipped with data monitoring and acquisition, your service is delivered.

► Fracturing and Acidizing Fluid Services

We offer a complete line of slickwater and gelled fracturing fluids in addition to a range of acid systems to provide the targeted stimulation service that delivers your well's productivity.

► Acid and Sand Transport

Acid and sand transport services for small and large treatments.

► Stimulation Products

Slickwater	Sand, Proppant
Waterfrac	Resin-coated Proppant
Gelled Fluids	MCA (Mud Cleanup Acid)
Matrix Acidizing	PAD (Paraffin-Asphaltene Acid)
Fracture Acidizing	DSA (Dolomite Soluble Acid)
Gelled & Viscosified Acid	SMA (Sandstone Mud Acid)

The FWS Service Difference

Franklin Well Services delivers high-performance acidizing and stimulation solutions backed by over four decades of proven industry expertise. Having successfully completed thousands of wells, we understand the distinct challenges of the industry ensuring our specialized treatments maximize productivity while maintaining adherence to safety and environmental standards.

By integrating advanced fluid chemistries, real-time monitoring, and cutting-edge pumping technologies, we enhance reservoir contact and well performance from day one. Our approach isn't just about a single job; it's about building long-term partnerships rooted in operational excellence, sustainability, and cost-effective outcomes. When you choose Franklin Well Services, you're choosing a team committed to elevating well productivity and longevity with every project.
